

WELCOME ADDRESS

Dear all participants,

First of all, I would like to extend a warm welcome to all participants to the Second International Seminar on Sustainable Urban Development or ISoSUD 2011.

This seminar is held by the Faculty of Landscape Architecture and Environmental Technology, Trisakti University.

The aim of this seminar is to encourage and facilitate interdisciplinary communication between scientists, engineers, economists, professionals, and decision makers working in sustainable urban development. Emphasis will be given to those areas that will most benefit from the application of scientific methods for sustainable urban development, including the best practices. Hopefully, by assessing progress and implementation gaps in sustainable urban development, a renewed political commitment for sustainable development would be secured and prepared for new and emerging challenges in our environment.
